

THE FINEST IN MUSICAL ENTERTAINMENT

# MILK & HONEY

## Additional Information and Requirements

Hello! The following document is the show Rider for Milk & Honey and contains helpful information. If you should have any problems fulfilling our needs and requests, PLEASE do not hesitate to contact us so we can reach a mutually agreeable solution. DON'T WAIT, We are reasonable and care about the problems and issues you may face regarding our show. We rely on you to bring these issues to our attention in a timely manner in order to help things run smoothly. We look forward to working with you and performing at your event!

Since professional lighting equipment will be used, fascinating moods, scenes, and effects can be created This special effect lighting does have minimum power requirements.

These requirements will also provide enough power for amplification and sound systems. Following are the specific power requirements

### (Indoor Requirements)

4- 20 amp, 110 volt circuits

### (Outdoor Requirements)

2- 50 amp, 220 , plus 4- 20 amp, 110 volt circuit( 200amp total )

Staging of setup area can be elevated or at ground level. In addition to the stage area, a light/ sound technician area will be needed for most events. The sound counsel area should be from 40 to 125 feet from the stage. The best location for the sound counsel would be directly centered in front of the stage. Areas to the left and right of the stage will work, but are not as preferred. If a full system is being used, please allow a 2 - 3 hours for set up time. This setup time should be completed before the arrival of the guests or persons attending. A tear down time 1 ½ hours will be required at the completion of the event. Following are the stage and sound counsel area requirements:

Main Stage: 11 x 20 feet (minimum)

Sound Counsel Area: 6 x 9F feet (minimum)

Dressing areas should be available as well as water and/or other beverages for the musicians.

Hotel room accommodations may be needed for events that require more than 125 miles of traveling from Cedar Falls.

No event is too large or small to accommodate, but smaller events do require downsizing and special setups in order to perform successfully. If the above minimum requirements cannot be met, please contact management or group personnel for a work around.

Outside events cannot be completed or performed in the event of poor weather conditions. Safety and the use of expensive electrical equipment make operation in adverse weather conditions impossible.

This information was provided to ensure that each event, venue, or party is as successful as possible. Thank You!
